QMPS has teamed up with Dairy One to offer a program that will help farmers reduce their Somatic Cell Count. This program utilizes a team approach to improve milk quality and help farms achieve their milk quality goals.

Join us at one of our regional meetings to learn about the program and how you can beat these new regulations OR achieve the quality you have always wanted!

All dairy farmers, family members, farm employees and veterinarians are encouraged to attend. Complimentary lunch and dinner will be served for those who RSVP by March 30th.
